1. Attach top, bottom, middle and sides together with 1 5/8" #6 Screws.

2. Join together 2 interlocking boards to form x-interlocks and slide into opening.

3. Attach (1) top trim, side trim, mid trim and (1) bottom trim with nails. Attach interlock face trim to interlocks with nails.

The side of face trim with the offset miter must be attached toward the side trim.

4. Attach second top trim to unit with nails.

If kit is going to be stacked with another kit follow trim kit instructions before attaching second bottom trim piece. If not then attach second bottom trim piece with nails.

Final Step

Securing to wall

Note: due to ceiling height restrictions it may be necessary to attach Corner brace on under side of Spacer bar.

Secure rack to wall by attaching 1" corner brace to top back spacer bar (or solid top) of unit. You will have 1 brace on the left and 1 on the right.

If you are securing a kit that is stacked on top of another unit follow the instructions for installing trim kit before attaching to wall.

Attach the corner braces to one of the middle spacer bars, if you have a bin unit or diamond cube unit that will have other racks stacked on top of it.
