1. Locate the top and sides of the rack. The sides will be the longer of the two rack sizes, the top will be the shorter one without six 1x2 supports attached to the bottom. Making sure the notches in the sides are facing up, nail through the top into each notch of the sides. Repeat for the bottom.

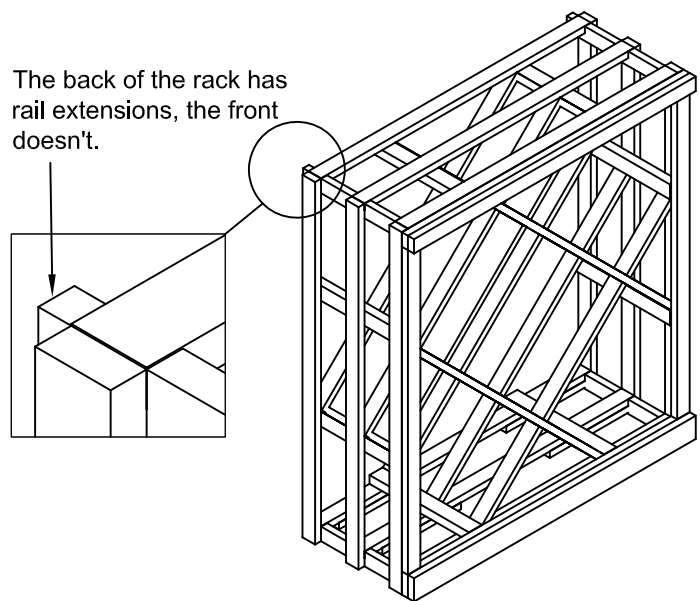

2. Assemble a grid on the floor as shown being sure to nail through each intersection. Notice all short tails will face towards the top and bottom, the long tails towards the sides. Repeat for the other 2 grids.

3. Insert the completed grids into the diamond bin evenly spaced as shown below.

Nail top, bottom and side trim to the front of the diamonds bin. Your top and bottom trim will be double stacked.

If kit is going to be stacked with another kit follow trim kit instructions before attaching second bottom trim piece. If not then attach second bottom trim piece with nails.

Final Step

Secure rack to wall by attaching wall brackets to top back spacer bar.
You will have 1 bracket on the left and 1 on the right.

RACK ASSEMBLY IS COMPLETE.
Always remove bottles before moving racks.
